

Master Software Developing with AI

Build AI-Powered Applications. Even If You've Never Coded Before.

The Future is AI

Artificial Intelligence is transforming the way software is developed. Previously, building applications required years of coding experience and large development teams. Today AI tools assist developers in writing code, launching applications, and building features faster than before.

Your Path to Building with AI

Delta AI Academy makes AI development simple and accessible for beginners, **without writing a single line of code.**

Traditional VS Ai-Powered Development

Traditional Route

1

Months of syntax, APIs, theory before shipping

2

Students copy tutorials but struggle to make their own product

3

Skill focus is memorising implementation details

4

Often no live result to show clients or employers

Delta Route

Project-first learning; AI tools handle much of the code generation

Students plan, direct, review, and deploy their own applications

Skill focus is product judgement, prompt structure, testing, tool orchestration

Every major project is built toward a shareable output

NEW FOUNDATION

What You Will Learn

24 hours prerecorded, lifetime access, community support, weekly webinar/Q&A, ongoing updates as AI tools change.

01 — AI Foundations

- What Is AI? + How AI Works
- What Is an AI Model? + Three Types of AI Models
- Tokens, Context Window & AI Hallucination
- Traditional vs AI-Powered Development
- AI Tools Overview
- Six Important Things to Know Before Building with AI
- Prompt Engineering Fundamentals for Non-Coders

02 — AI-Assisted Design & Website Building

- Identifying Typical AI Design Patterns
- How to Find Strong Design References
- Creating Designs with Figma Stitch
- Claude Code: Complete Beginner Explanation
- Claude Code Skills and Commands
- Building a Creative Landing Page
- Building a Portfolio Website
- GitHub Basics for Project Delivery
- Hosting with Vercel
- Connecting a Domain

03 — Full-Stack Web Application Building

- What Is Full Stack?
- Understanding Different Tech Stacks
- Project Planning Phase
- MD Files for AI Agent Setup
- Starting the Development Process — Parts 1, 2, 3
- Hosting Frontend and Backend
- Ecommerce Application Build
- Social Media App Planning
- Social Media App Build — Parts 1, 2
- Social Media App Hosting

04 - Mobile Application Fundamentals

- Website vs Mobile Application
- Mobile Application Fundamentals
- Mobile App Build — Parts 1, 2
- APK Setup and Testing on Phone

Abshar

Academic Head

4+ years of experience in software development, with expertise in 45+ web & mobile applications, IT hosting, and AWS cloud technologies. AWS Certified Developer.

Shan

Chief Mentor

2+ years of experience in software development and AI technologies, specializing in AI tools, automation, and modern development workflows.

Offer & Inclusions

Duration	24 hours
Delivery	Prerecorded, lifetime access
Requirement	No prior coding or AI experience
Support	Community + weekly webinar/Q&A
Updates	Content stays current with AI tools, workflows, trends
Certificate	Certificate of completion awarded after finishing all modules and projects
Languages	English track for international learners; Malayalam support/course focus for Kerala audiences
Pricing	AED 99 and INR 999 (one plan includes all modules, projects, tools and support)

“The future belongs to people who build and innovate.”
